

# T-CLIP

## FOR UNLIMITED POSSIBILITIES

### IT'S DOWN TO YOU TO PLAY WITH THE T-CLIP ...

In addition to its accessories, the T-Clip allows you to mount numerous indispensable everyday objects on your aluminium profiles. This opens up endless work space possibilities.

Fixed without tools, the T-Clip is repositionable and doesn't damage your profiles.

## UNIVERSAL PROFILE FIXING SYSTEM

Just one T-Clip can mount, on over 85% of aluminium profiles, any object of under 5 kg and from 1.25 to 8.5 mm (profile thickness inclusive). A single hole of 15mm in the unit to be mounted is sufficient to insert the T-Clip and it will be ready to install on the profile.

## ENDLESS POSSIBILITIES

Need to organise the electrical installation of your workstation? With T-Clip, a groove, an electric housing or an electric switch are installed in no time, with only three movements.  
Need a small storage box on hand to store your screws? A hole directly in a box or in an adapted rail and it's done.

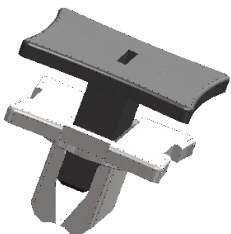

## AN OPTIMISED AND SAFE WORK AREA

Thanks to the T-Clip, its accessories and a little inventiveness, the work space is built to measure.  
It becomes simple to adapt your work space... and its T-Clips.

WORLDWIDE  
PATENTS  
PENDING

## THE T-CLIP CAN BE USED OVER AND OVER AGAIN

Tools that change, needs that evolve, a desire for change? With a simple turn of the screwdriver, your T-Clip is separated from the profile and the object can be repositioned without damaging the surface.
